

Summer 2008 Course Descriptions and Details

Pets and Critters

Geared to Grades K-5

Join us for a fun pets and critters theme course using "Petonomics: The Purr-fect Economics Primer" and other pets and critters resources. Fun children's literature books are used to deliver these "Purr-fect" lessons. Hop on the bus with the Cat in the Hat as students explore how to care for a pet and learn about decision making. Learn about barter trade as five sheep frantically figure out how to pay for a birthday gift. Use the D.O.G.S. model of decision making to determine your perfect pet and to make other important decisions. Interactive games and hands-on activities will keep students engaged as they experience learning economics, working cooperatively, responsibility in a way that is fun and exciting. You'll visit either the Lake Erie Nature and Science Center or Penitentiary Glen for an animal/ wildlife program and tour of the rehabilitation facilities and receive the "Petonomics: The Purr-fect Economics Primer." Instructor: Linda Spencer
