The College of Nursing and Health Sciences History
The Ashland University Dwight Schar College of Nursing and Health Sciences heritage is derived from the Department of Nursing at Ashland University. The Department of Nursing was established in 1980, offering a RN to BSN program for students with a diploma or associates degree. The department, established in 1980, provided an opportunity for registered nurses to earn the Bachelor of Science in Nursing degree. The RN-BSN program was accredited by National League for Nursing Accrediting Commission (NLNAC) from 1986 through 2002 and received Commission on Collegiate Nursing Education (CCNE) accreditation in May 2003.

MedCentral College of Nursing was formally established in 1997 and admitted its first class of students in 1999. The program was formally a diploma-based program, the Mansfield General School of Nursing that began in 1919. The program was accredited by the Commission on Collegiate Nursing Education in 2003. In 2010, the MedCentral College of Nursing was acquired by Ashland University. The Mansfield General Hospital School of Nursing began in 1919. The program was accredited by the Commission on Collegiate Nursing Education in 2003. In 2010, the MedCentral College of Nursing was acquired by Ashland University. At the time of their closure, 571 baccalaureate students had graduated from the MedCentral College of Nursing. With the 1,717 graduates from the Mansfield General Hospital School of Nursing, the total number of graduates from 1922 forward was 2,288.

The Ashland University Department of Nursing and the MedCentral College of Nursing became the Ashland University Dwight Schar College of Nursing. At the time of the acquisition, the MedCentral College of Nursing offered both a traditional BSN and an accelerated second-degree BSN. The Ashland University Department of Nursing offered a fully on-line RN to BSN program, a school nurse licensure program, and a gerontology certificate and minor.

In 2012, the University determined to add health sciences programs to the College. Current programs in athletic training, dietetics, and exercise science were added to the College, and in the fall of 2012, the College began actively pursuing opportunities in interprofessional education. The name of the College officially became the Dwight Schar College of Nursing and Health Sciences.

School Nurse Certificate
The School Nurse Certificate prepares Bachelor-prepared nurses who wish to focus their career on the application of knowledge and skills in the school setting. Successful completion of this program allows students to apply for the Ohio Department of Education Professional Pupil Services License as a School Nurse. School Nurse is a protected title in Ohio and may only be utilized by those nurses successfully completing an approved program of study. This program was previously referred to the School Nurse Licensure program (SNL), however, it was changed to School Nurse Certificate in 2017. This change reflects the program’s role in preparing students to be eligible for the Ohio Department of Education’s Pupil Services License, but the program does not grant the license.

The School Nurse Certificate consists of 13-16 graduate credits. The program is offered utilizing an online format to allow maximum flexibility. The School Nurse Internship is an integral part of the program of study, as well as the culminating activity. The internship represents the application of knowledge and skills in this specialized area of
nursing practice. The internship can be completed in the school district of current employment. If a student is not currently working within a school district, the student will be placed within a nearby school district. The internship requirement varies from 2-4 hours, depending on the student’s experience.

**Mission of Ashland University**
Ashland University, guided by our Christian heritage, is a comprehensive, private university that provides a transformative learning experience, shaping graduates who work, serve, and lead with integrity in their local, national, and global communities. The mission was adopted by the University Board of Trustees on January 29, 2016.

**Mission of the Dwight Schar College of Nursing and Health Sciences**
The mission of the College of Nursing and Health Sciences is to educate individuals to become health care professionals committed to health-related practice, leadership, and service. The programs provide undergraduate and graduate education in health science professions. Our guiding values are integrity, caring, accountability, respect, and excellence. Our vision is to be the premier College of Nursing and Health Sciences in the Midwest, educating graduates to serve a global and diverse society.

**Mission of the Department of Nursing**
The mission of the Nursing Department is to educate individuals to become nurse leaders committed to evidence-based practice and service in a diverse and global society. Our innovative nursing programs embrace the college’s ICARE values (integrity, caring, accountability, respect, and excellence), interprofessional collaboration, scholarship, and lifelong learning.

**Definition of School Nursing**
School nursing, a specialized practice of nursing, protects and promotes student health, facilitates optimal development, and advances academic success. School nurses, grounded in ethical and evidence-based practice, are the leaders who bridge health care and education, provide care coordination, advocate for quality student-centered care, and collaborate to design systems that allow individuals and communities to develop their full potential. Adopted by the NASN Board of Directors February 2017

**School Nurse Certificate Purpose**
The School Nurse Certificate provides the specialized knowledge and skills necessary to apply for the Ohio Department of Education Professional Pupil Services License as a School Nurse. The program provides a strong foundation in community health and education foundations, as well as preparing the nurse to practice as a member of an interprofessional team member in a non-healthcare setting.

**Faculty Roles**
The following are faculty roles. Please be aware that you may have more than one faculty serve in these roles.
Clinical Faculty – During the School Nurse Internship, all students will be assigned a clinical faculty. This clinical faculty provide supervision during the internship experience. The clinical faculty will work 1:1 with the students to develop learning objectives and evaluate the student during the internship. All clinical faculty are ODE licensed School Nurses, with a Master’s degree, and at least 5 years school nursing experience.

Program Director – The School Nursing Program Director oversees the curriculum and the daily operations of the program. The program director provides approval for students to enter the internship and provides approval for program completion. The program director oversees recruitment and growth of the program in collaboration with the SNP Team.

School Nurse Certificate Student Learning Outcomes

Upon completion of the School Nurse Certificate, the student will be able to:

1. Utilize the nursing process to deliver age appropriate and culturally competent care in the school setting.
2. Demonstrate safe nursing practices in communication and information management.
3. Utilize professional behavior skills to provide leadership in the practice of school nursing.
4. Integrate evidence and research nursing to contribute to quality school nursing practice.
5. Evaluate his/her own nursing practice in relation to professional practice standards and guidelines of School Nursing.
6. Promote a healthy, safe, collaborative practice environment.
School Nurse Certificate Curriculum
The program curriculum is developed in accordance with the mission, goals, and expected student outcomes. The completion of the program requirements meets the ODE requirements to apply for the Professional Pupil Services License as a School Nurse. Following successful approval by ODE, the student may then attain the title of School Nurse (LSN).

The curriculum was developed in alignment with the Ashland University mission, the purpose of the Ashland University Graduate School, and the School Nurse Certificate Outcomes. Courses in the program include foundational courses in school nursing practice, education, and the interprofessional collaboration. Courses are provided in an interdisciplinary format.

Admission to the School Nurse Certificate is on a rolling basis. Students may apply and begin coursework during any semester. The flexible curriculum allows for students to complete the program on his/her own time schedule. Most students complete the program in 9-15 months (3-5 semesters). A curriculum guide will be completed for each student based upon the needs and timeframe that best fits the student’s schedule.

Variable Credit Opportunities
SNP 520
Students are may choose either the 2-hr. or 3-hr. option for SNP 520. The course requirements will be the same with the exception of an additional final paper for the 3-hr. option. Students may choose the 3-hr option for several reasons: (1) earn additional graduate credit (2) meet the 6-hr requirement to renew the Temporary Pupil Services license (3) earn extra graduate credit towards the 15 credit hours in the School Nurse cognate of the Med Adult Ed program.
**School Nurse Internship**

Students may complete an internship experience from 2-4 credit hours, eligibility is based upon previous experience. With one-year full-time experience, a student may complete the 2-hr. internship, which is equivalent to 160 clinical hours. Students with less than one-year full-time experience will complete a 4-hr. internship, which is equivalent to 320 clinical hours. Students, eligible for the 2-hr. experience but looking to gain additional graduate credit hours, may also choose to complete a 3-hr. internship (240 clinical hours) or the 4-hr. (320 clinical hours) instead of the required 2-hr. internship experience. All internship experiences will be supervised by Ashland University Clinical Faculty. A District School Nurse Mentor (preceptor) will also be assigned to all students requiring the 4-hr. internship. In the event a District School Nurse Mentor is not available, the Program Director will serve in this role.

**Requirements for School Nurse Certificate Program Completion**

1. Completion of all course requirements according to the SNP Grading Policy and have a minimum cumulative grade point average (GPA) of 3.0 on a 4.0 scale.

2. Successful completion of the School Nurse Internship.
School Nurse Program Course Fees
Course fees are billed the term the course is taken.

**Program Policies**

The following policies and regulations have been designed to assist you in your progression in the School Nurse Certificate. These policies set minimal standards for the rights and responsibilities of students and faculty. Students are expected to abide by all policies and standards established by the program.

The College reserves the right to change program requirements without prior notice to reflect advances in the profession or changes in general university requirements. A student who withdraws from the College and is later re-admitted is subject to policies in effect at the time of readmission.

**Academic Program Progression/Completion**

The student must complete all requirements for the School Nurse Certificate within five years. The time limit normally is from the beginning date of the formal admission to the program to the last hours applied toward the program. Special consideration will be given for leaves of absence for adequate cause. The student, who fails to take courses or otherwise continue to pursue the program for a period three consecutive semesters, will be terminated from the program’s active file and will be required to reapply for reactivation of his or her records. There is no loss of credit, though the five-year time limit will be observed. The School Nursing Program Director will reevaluate the student’s courses and recommend any course work for audit.

**Assessment and Evaluation**

In striving for academic excellence in nursing education, the program seeks to gather relevant feedback in reference to curriculum, support services, governance and quality of teaching/clinical instruction. This ongoing process necessitates occasional surveys and questionnaires, which, although not a part of the instructional program, are designed to collect the feedback that is essential to the assessment process. Completion of these surveys and questionnaires, are expected of all students, faculty, professional staff and administration as part of their professional responsibilities.

Faculty, teaching assistants, and preceptors will be evaluated by students at the end of each course, clinical, and laboratory experience as appropriate for the individual course. Additionally, Department Chairs will conduct evaluations of faculty and teaching assistants within their departments according to University policies. These evaluations are for the purpose of (1) assuring the educator provides pedagogically sound teaching and learning experiences in course, clinical, and laboratory experiences, and (2) assuring the educator provides experiences that facilitate student accomplishment of course outcomes.

**Chemical Impairment**

The University and the College is committed to providing compassionate and proactive assistance for chemically impaired or co-dependent students and their families and to afford students, who are not legally restricted and are no longer chemically impaired, the opportunity to continue their education without stigma or penalty, and to protecting society from harm that impaired students could cause.
POLICIES

The College defines chemical impairment as a chronic, progressive illness which involves the use of alcohol and/or other drugs/chemicals to a degree where it interferes in the normal functional life of an individual as manifested by health, family, job, legal, financial and/or emotional problems. Students may be suspected of improperly using or abusing drugs or alcohol on the basis of one or more of the following:

- Possession of an illegal substance
- Conviction of a drug-related crime
- Theft of a drug product of abuse potential
- Chemical impairment at school or a school-sponsored function
- Unexplained decrease in class attendance or academic performance that may be related to chemical substance abuse.
- Concern expressed by a faculty member, staff member, fellow student, preceptor, other health professional, police authority, or others regarding possible chemical substance abuse.
- Positive urine drug screen on a routine drug test or required urine screen for a specific clinical placement site.

If a nursing student is aware that he or she is impaired by substance abuse, he or she has the responsibility to seek assistance for diagnosis and treatment. Assistance can be obtained through the University Health Service.

A student suspected of chemical impairment may be confronted by a faculty or staff member or administrator and referred to the Dean of the College. If the student is unwilling to seek assistance or go for drug screening upon request at the expense of the College, the student will be dismissed from the program. Student confidentiality will be maintained at all times.

Formal Complaint

Purpose:
Provide a policy and procedure for filing a complaint arising from a person(s) internal or external to the Dwight Schar College of Nursing and Health Sciences. All information regarding the complaint shall be kept confidential. Those investigating a complaint may only discuss it with those individuals who are immediately involved in the dispute. If the College of Nursing and Health Sciences deems a complaint to be “inappropriate” under this policy, the person submitting the complaint will be notified of a more appropriate avenue to pursue for resolution.

Definitions:
“Appropriate” complaint: defined as a noted dissatisfaction with any application or interpretation of a work process, policy or procedure at the College of Nursing and Health Sciences other than academic integrity issues (graduate – Student Appeal Policy (See Ashland University Graduate Catalog)).

Internal Constituents: defined as the College of Nursing and Health Sciences students, faculty, administration and staff; Ashland University community.
External Constituents: external agencies (including clinical agencies and other providers of goods and services), prospective students to Ashland University and/or the College of Nursing and Health Sciences, the general public (including patients served as part of a clinical experience).

Process:
- Ashland University Dwight Schar College of Nursing and Health Sciences students will submit a written complaint, concern or improvement suggestion using the online reporting link: https://www.ashland.edu/student-affairs/content/student-complaint-form
- All external constituents will submit a written complaint, concern or improvement suggestion using the online reporting link: https://www.ashland.edu/conhs/content/college-nursing-health-sciences-contact-form
- A College of Nursing and Health Sciences designee shall respond to the complaint (internal or external) in writing within seven (7) working days of its receipt. If additional time is needed to respond to the complaint, the person filing the complaint will be notified.
- If resolution of the complaint cannot be achieved at the college-level, the situation will be taken to the university administration to receive input for resolution.

Grade Policy
SNP students must maintain a minimum cumulative grade point average (GPA) of 3.0 and must achieve a “B-“ grade or higher in all courses. If a student’s Cumulative GPA falls below 3.0 the student may be placed on academic probation and is subject to dismissal. (See Graduate School Academic Probation/Dismissal Policy.)

“C+” grades or below are not acceptable. Courses in which these grades have been earned must be repeated during the next semester in which the course is offered. If a student subsequently receives two unacceptable grades, the student will be dismissed from the Program. The student must receive a passing grade to meet the requirements for approval of the SNP internship.

Grade Scale
The Dwight Schar College of Nursing and Health Sciences adheres to the following system of letter grades and quality points.

<table>
<thead>
<tr>

</tbody>
</table>
Online Discussion Board Confidentiality
All online discussion boards must adhere to current HIPAA regulations as well the Code of Ethics for Nurses related to confidentiality. Pseudonyms must be used for all persons and/or institutions/agencies in your postings. Breach of patient or institution/agency confidentiality will constitute grounds for dismissal from the nursing programs. Access is limited to course faculty and students enrolled in the course. However, occasionally guest speakers or other College of Nursing and Health Sciences faculty members may access discussion boards for specific purposes. Students will be notified in advance if this is planned.

Program of Study/Program Plan
Newly admitted students will meet with an Academic Advisor from Graduate, Online, and Adult Studies to create a program of study to outline the course rotations and course completion. Students will be contacted each semester to register for the subsequent semester courses by the Academic Advisors. Students may also contact the Academic Advisor as needed.

Standards of Professional Conduct
In accord with the 2015 American Nurses Association's (ANA) Code of Ethics for Nurses with Interpretive Statements (Code for Nurses), which explicates the goals, values, and ethical precepts that direct the profession of nursing, standards of professional conduct for graduate students of nursing at Ashland University College of Nursing and Health Sciences are defined herein. During enrollment in the nursing graduate programs, all students are expected to abide by the ANA Code of Ethics for Nurses with Interpretive Statements. These standards apply both on campus and during all program and University off campus experiences, including all course-related practice, online and electronic communication and research activities.

http://www.nursingworld.org/MainMenuCategories/EthicsStandards/CodeofEthicsforNurses

Faculty and administration of the College of Nursing and Health Sciences consider violations of professional conduct to be serious. While it is recognized that “to err is human,” errors of judgment, failure to demonstrate professional behavior, lack of preparedness and safe practice, incivility (verbally, behaviorally, or in writing, directly or indirectly through a third party), and lack of responsibility as expressed in absence and lateness reflect overall lack of professional comportment.

Dependent upon the nature of the violation, disciplinary action may be applied to an individual violation. In addition, an annual review of accumulated violations may be judged to reflect a pattern of behavior inconsistent with professional conduct and lead to dismissal.
Transfer Credit
A maximum of nine (9) graduate level credits from an accredited college or university may be transferred toward completion of the requirements for the School Nurse Certificate. Official transcripts certifying graduate level courses completed at another institution prior to admission to Ashland University should be submitted at the time of application and will be evaluated by the School Nursing Program Director for acceptability as transfer credit. Transfer credit will only be accepted for courses in which a grade of B (3.0 on 4.0 scale) or higher has been received. Students should request a transcript review in writing.

Withdrawal from University/Termination of Attendance
If a student is registered for class(es) but will not be attending, written notification of intention not to attend must be submitted to the School Nursing Program Director before the first day of class. Students who do not officially withdraw from class or from semester enrollment are subject to university policy which may include financial consequence.

When officially withdrawing from the University ON OR AFTER THE FIRST DAY OF CLASS of the semester, a student receives a refund of part of the tuition charged for the semester in accordance with University policy.

Writing Style
All papers and manuscripts submitted for SNP courses must be prepared according to the Publication Manual of the American Psychological Association (APA), most current edition. The Publication Manual of the APA provides a uniform and reasonably simple method of format and style to be used when writing scholarly papers. Originally designed by APA for papers submitted for publication in its journal, the APA style has become the accepted method for writing papers.

PROGRAM REQUIREMENTS

Computer Requirement
Students enrolled in the program should view the University Information Technology site to determine the minimum computer specifications that are acceptable for the program. Coursework is offered in an on-line format; therefore, students’ computers must meet these minimum specifications.

Licensure Requirements
RN License
School Nurse Certificate students must maintain an unencumbered professional nursing license throughout their enrollment in the School Nursing Program.

School Nurse Certificate applicants are to submit proof of their current unencumbered professional nursing license/recognition to the Admissions Representative with the initial application packet. Thereafter, students must submit their unencumbered professional nursing license verification upon renewal to the School Nursing Program Director. Students are responsible for notifying the Director of any changes in licensure status.
**Temporary Pupil Services License**
Students may obtain and maintain the ODE Temporary Pupil Services License, depending on employment requirements. To renew the temporary license yearly, students must complete 6 credit hours per school year. All temporary licenses must be renewed by July 1 of each year.

**Transcripts/Records**

**Transcripts**
Official transcripts of previous education and application will be managed by Ashland University Enrollment Services, 401 College Ave., Ashland, Ohio 44805. Students may be accepted on unofficial transcripts, but an official copy is required to be on file by the end of the 1st 8-week course.

**Records Retention**
1. Copies of Student Intern and Preceptor/Clinical Faculty evaluations will be maintained in a student file housed in the College of Nursing and Health Sciences.
2. Copies of Preceptor Applications, Resumes, and Intern Placement Records will be maintained by the College of Nursing and Health Sciences.
3. Copies of University Clinical Faculty evaluations completed by the Intern will be forwarded to the School Nursing Program Director, College of Nursing and Health Sciences.
School Nurse Certificate Internship Handbook

SNP 680
School Nurse Certificate
The School Nurse Certificate prepares bachelor-prepared nurses who wish to focus their career on the application of advanced nursing knowledge and skills in the school setting. Successful completion of this program allows students to apply for the Ohio Department of Education Professional Pupil Services License as a School Nurse. School Nurse is a protected title in Ohio and may only be utilized by those nurses successfully completing an approved program of study. This program provides a strong foundation in community health and educational foundations, as well as preparing the nurse to practice as a member of an interprofessional team member in a non-healthcare setting.

The School Nurse Certificate consists of 13-16 graduate credits. The program is offered utilizing an online format to allow maximum flexibility. The School Nurse Internship is an integral part of the program of study, as well as the culminating activity. The internship represents the application of advanced nursing knowledge and skills in the specialized area of school nursing. The internship can be completed in the school district of current employment. If a student is not currently working within a school district, the student will be placed within a nearby school district. Students may complete an internship experience from 2-4 credit hours, eligibility is based upon previous experience. With one-year full-time experience, a student may complete the 2-hr. internship, which is equivalent to 160 clinical hours. Students with less than one-year full-time experience will complete a 4-hr. internship, which is equivalent to 320 clinical hours. Students, eligible for the 2-hr. experience but looking to gain additional graduate credit hours, may also choose to complete a 3-hr. internship (240 clinical hours) or the 4-hr. (320 clinical hours) instead of the required 2-hr. internship experience. All internship experiences will be supervised by Ashland University Clinical Faculty. A District School Nurse Mentor (preceptor) will also be assigned to all students requiring the 4-hr. internship. In the event a District School Nurse Mentor is not available, the Program Director will serve in this role.

School Nurse Certificate Student Learning Outcomes
Upon completion of the School Nurse Certificate, the student will be able to:

1. Utilize the nursing process to deliver age appropriate and culturally competent care in the school setting.
2. Demonstrate safe nursing practices in the communication and information.
3. Utilize professional behavior skills to provide leadership in the practice of school nursing.
4. Integrate evidence and research nursing to contribute to quality school nursing practice.
5. Evaluate his/her own nursing practice in relation to professional practice standards and guidelines of School Nursing.
6. Promote a healthy, safe, collaborative practice environment.
The School Nurse Internship
At the conclusion of the School Nurse Internship, the student shall be able to:

1. Demonstrate competence in the knowledge of and experience in the role and responsibilities of the school nurse in assessing. Planning, implementing, and evaluating school health programs and activities in collaboration with other professionals. (Std. #1)
2. Demonstrate competence in the knowledge of and experience in assessing students, staff, and families. (Std. #1)
3. Demonstrate competence in the knowledge of state and federal mandates as they relate to school health programs. (Std. #3)
4. Demonstrate competence in the knowledge of human growth and development as it relates to the learning process. (Std. #1)
5. Demonstrate competence in the knowledge of and experience in using a holistic approach in the health assessment of students, which includes a review of health care needs, problems and concerns of children and youth. This shall include, but not be limited to, the following screenings: vision, hearing, nutrition, blood pressure, growth and development and scoliosis. (Std. #1)
6. Demonstrate competence in the knowledge of and experience in assessment and evaluation of factors which impede the educational progress of children and youth including, but not limited to: child abuse, pregnancy, substance abuse and suicide, (Std. #2)
7. Demonstrate competence in the knowledge of and experience in assisting students, staff and families to use available community resources in meeting health care needs. (Std. #2)
8. Demonstrate competence in the knowledge of the impact of technological, cultural and social change on children and youth including, but not limited to: family structure and violence. (Std. #2)
9. Demonstrate competence in the knowledge of and experience in using the environmental, safety, and health standards to protect the health of all in the school community including, but not limited to: national occupational health standards and standard precautions. (Std. #1)
10. Demonstrate competence in the knowledge of and experience in utilizing the nursing process to develop and implement individual health care plans and in collaboration in the development of individualized education plans for selected children and youth. (Std. #1, 2)
11. Demonstrate competence in the knowledge of and experience in individual, family and group health counseling. (Std. #2)
12. Demonstrate competence in the knowledge of the organization and politics of education. (Std. #3)
13. Demonstrate competence in the knowledge of legal and ethical issues related to the practice of school nursing. (Std. #3)
14. Demonstrate competence in the knowledge of and experience in provision of health education as a resource person to school staff and students as well as the curriculum development process. (Std. #2)
15. Demonstrate ability to reflect on the extent to which learning objectives were met, appropriateness of methodology used, and professional development to improve personal performance. (Std. #3)
Clinical Performance Criteria

1. Utilize the nursing process in collaboration with other professionals to:
   a. Assess, plan, implement and evaluate school health programs and activities which promote wellness. (Course Objectives #1 & 2)
   b. Assess needs, problems, and concerns of students including screening for vision, hearing, nutrition, blood pressure, growth and development, scoliosis. (Course Objectives #4 & 5)
   c. Establish collaborative relationships with those in the school health system. (Course Objective #14)
   d. Utilize community resources to meet health care needs. (Course Objective #7)
   e. Participate in individual/family/group health counseling. (Course Objective #11)
   f. Collaborate in the development of individual health care plans and individual education plans. (Course Objective #10)

2. Comply with state and federal mandates and codes of ethics in the practice of school health nursing. (Course Objectives #3, 8,9,13)

3. Assess societal factors which impact on the educational progress of children to include, but not limited to: child abuse, pregnancy, substance abuse, suicide, family structure, and violence. (Course Objectives #6, 8)

4. Participate in activities which promote the maintenance of a healthful school environment. (Course Objective #9)

5. Participate in appropriate professional organizations and self-improvement reflection activities. (Course Objectives #12, 15)

6. Participate in health education activities by acting as a resource person and collaborate with appropriate persons in the development/implementation of health education curriculum/programs. (Course Objectives #3, 8,9,13)

Internship Setting Policy

- The School Nurse Internship may be completed at the student’s current building/district of employment, with approval from the District and the University.
- If the student is not currently employed within a district/building, a clinical placement will be arranged through the College of Nursing and the surrounding districts of the student.
- The student, clinical faculty, and preceptor/district mentor, if needed, will discuss the objectives for the internship during a pre-conference meeting. This activity often clarifies the expectations of both parties and provides the opportunity for the student and mentor to discuss, negotiate, and outline explicit learning outcomes. These outcomes will be based on the particular focus of the course as well as the student’s individual place in the learning process and career interests.
Internship Prerequisites
1. Holds current, unencumbered RN license.
2. Successful completion of all School Nurse Certificate courses.
3. Maintenance of a cumulative grade point average of 3.0.
4. Submission of Internship Application and supporting documents
5. Signed Exchange of Services Agreement between the district and AU.

Application
1. Completion of the School Nurse Internship Application should be completed and submitted to the Director of the School Nursing Program at least 8 weeks prior to the semester of the expected semester for the Internship.
2. Documentation of all clinical requirements:
   a. A copy of current BCI and FBI check on file in school of employment (secure background check if current one not on file at student’s expense);
   b. Documentation of completion of all health requirements by the Internship site school;
      If no health mandates required, submit signed statement to this effect.
   c. A copy of OBN verification of RN license.
3. The Internship experience is technically a clinical placement, regardless of completion in your site of employment. AU must review current FBI/BCI background checks as part of our affiliation agreements with each district. This is necessary for ALL students.

Fingerprinting
1. Where to obtain FBI/BCI Background Checks:
   - Current district of employment (if offered)
   - District of internship placement (if offered)
   - Local law enforcement agencies
     https://www.nbinformation.com/locations/lawEnforcement/OH.php
   - Local hospital HR (if currently employed)
   - Private fingerprinting agencies
     https://www.fastfingerprints.com/Public/LocationList.aspx?DisplayState=OH
2. Fingerprinting code for ODE: 3319.291 School employee/licensure. You will be asked for this code prior to your fingerprinting. A copy will automatically be sent to ODE. You can also request a copy be sent to you. You will share your copy with AU.
3. ODE will require the FBI and BCI background checks submitted for the licensure approval to be current within 365 days of application date. If the student’s background checks will not fall within this time period upon completing the Internship it may be prudent to secure updated background checks. This would facilitate and prevent delay during the ODE licensure approval process.

Determination of Internship Hours Required
1. Two credit hour internship (160 clinical hours)
   Applicant has minimum of one-year full-time employment as a nurse in a school system.
2. Three credit hour internship (240 clinical hours)
Applicant has minimum of one-year full-time employment as a nurse in a school system. Applicant chooses to take additional credit hours.

3. Four credit hour internship (320 clinical hours)
   Applicant does not have a validated minimum of one-year full-time employment as nurse in a school system.
   OR
   Applicant has minimum of one-year full-time employment as a nurse in a school system. Applicant chooses to take additional credit hours.

Placement Process
1. The Program Director selects, with input from Student Intern, an appropriate school district for placement and secures permission from the school district. Students currently employed in a school setting, may request completion in his/her current setting.
2. The Program Director, with input from Student Intern, secures School Nurse Mentor/preceptor for students requiring the 4 credit hours internship. Students eligible for 2 credit hours may choose to register for 4 credit hours, but will not require the School Nurse Mentor/preceptor.
3. The Program Director assigns a University Clinical Faculty member to each Student Intern to facilitate all internship requirements.

This internship is designed to prepare the Bachelor’s prepared registered nurse (RN) for practice as a school nurse in the provision of school nursing and school health services with children and youth which meets the national standards of the profession and the requirements of the State of Ohio. This is a precepted and/or supervised experience which provides the opportunity for the student to orient to the role of the school nurse. Under supervision, the student intern gradually assumes a full schedule of school nursing practice.

The school nurse intern is expected to gradually assume the school nursing role and responsibilities without the preceptor being present; however, the preceptor shall be available at all times.

This study is broadening the experience that involves the application of knowledge, skills, and attitudes obtained by the school nurse intern during the required courses specific to the school nurse certificate.

FINAL EVALUATION CRITERIA
1. Documentation to validate the required clinical hours of supervised practice with a University Clinical Faculty and/or District School Nurse Mentor in a school setting.
2. Participate in a minimum of two (2) teaching experiences on a health-related topic (One related to staff training needs and one related to student learning needs). Develop appropriate lesson plans for each session.
3. Completion of a School Nurse Competency Evaluation. This tool enables the student to document demonstration of practice activities meeting the NASN/ANA Scope of Practice and Standards of the School Nurse. Interns must provide evidence of meeting every standard and at least 80% of competencies.

4. Completion of Professional Practice School Nurse Self-Evaluation and Professional Goal Setting. This tool also allows for professional self-evaluation and goal setting and measures individual Intern’s growth by standard from SNP 525 to 680.

5. Completion of a Reflection Paper. This paper will allow the Intern to reflect upon the professional growth in education and application of school nursing concepts.

**Requirements for School Nurse Certificate Completion**

1. Completion of all course requirements according to the SNP Grading Policy and have a minimum cumulative grade point average (GPA) of 3.0 on a 4.0 scale.
2. Successful completion of the School Nurse Internship.
3. Completion of the course and program evaluation surveys.
School Nurse Internship Guidelines

Qualifications of University Clinical Faculty
1. Status as professor or adjunct professor in the College of Nursing and Health Sciences and holds a minimum of a Master’s degree.
2. Expertise in the teaching/learning process.
3. Demonstrates a thorough understanding of school nursing and the School Nurse Certificate.
4. ODE Professional Pupil Services License: School Nurse with minimum of five years school nurse experience (past/present) preferred.

Qualifications of District School Nurse Mentor/Preceptor
1. Holds current, valid RN license.
2. Holds a current Professional Pupil Services License: School Nurse issued by the Ohio Department of Education.
3. Has a minimum of three years experience in the capacity of school nurse.
4. Mutually agrees to function as a District School Nurse Mentor/Preceptor.
5. Required for all students qualifying for the 4 hour internship.
6. Provides guidance on day-to-day school nursing practice and policies/procedures specific to the assigned district.

Roles and Responsibilities

Student Intern
A. The Internship is an important part of the School Nurse Certificate. The internship provides opportunities, under the guidance and supervision of experienced and successful practitioners, for the Student Intern to develop and evaluate knowledge and skills in the major areas of school nursing.

B. To achieve the goals of the internship experience, the student will perform the following tasks:
1. Complete the Application for School Nurse Internship one semester prior to the semester in which the student would like to begin the Internship, and submit the application to the Program Director of the School Nurse Certificate.
2. Collaborate with District School Nurse Mentor and/or University Clinical Faculty to complete required days of Internship experience with documentation on the Attendance Tracking Form.
3. Participate in a minimum of two (2) teaching experiences on a health-related topic. Student Intern must develop appropriate Lesson Plan Forms for the group teaching sessions (one staff and one student audience).
4. Collaborate with the District School Nurse Mentor to gradually assume full responsibility for the role of the school nurse, if applicable.
5. Demonstrate knowledge of the objectives of the School Nurse Certificate.
6. Conscientiously seek to utilize the suggestions of the University Clinical Faculty and District School Nurse Mentor to improve performance.
7. Continually evaluate own performance in relation to the goals and objectives of the internship.
8. Participate in University Clinical Faculty and District School Nurse Mentor conferences following periodic visitations.
9. Provide evidence from practice of meeting all of the Scope and Standards of Professional School Nursing Practice and at least 80% of the competencies.
11. Complete University Clinical Faculty Evaluation and District School Nurse Mentor Evaluation at the conclusion of the internship.

**District School Nurse Mentor/Preceptor**

A District School Nurse Mentor/Preceptor will be assigned for Interns required to complete the 4-hour internship. If a District School Nurse/Mentor is not available, the Program Director will serve in this role.

A. The District School Nurse Mentor/Preceptor is a regularly assigned school nurse who works directly with the student intern. The Mentor/Preceptor will also work directly with the University Clinical Faculty to structure learning experiences that fulfill the prescribed licensure/certification standards and provide opportunities for the student to demonstrate competencies related to school nursing practice. A mentor represents a nurse employed by the same district as the student intern, completing the internship in the district of employment. The Preceptor represents school nurse employed by a district and the student intern has been placed in that district as a student intern, not an employee. The preceptor is legally responsible for the general welfare of the students in the schools.

B. The School Nurse Mentor/Preceptor enables the Student Intern to be accepted by pupils, teachers, staff, and administrative personnel; defines the role of the student to these parties; determines which responsibilities are to be delegated to the Student Intern and decides when the Student Intern is ready to assume them. The Mentor treats the Student Intern as a colleague, thus promoting acceptance and success in the learning experiences.

C. To achieve the goals for the internship experience, the Mentor/Preceptor will perform the following tasks:

1. Develop with the Student Intern an understanding of the objectives outlined for the internship.
2. Inform the Student Intern as to their strengths and weaknesses so that continued growth may occur.
3. Orient the Student Intern to the following areas: building; personnel; policies and procedures; pupils; routines and daily activities; documentation procedures; availability of community resources; opportunities for classroom teaching.
activities and learning resources; professional organizations and school committees/conferences.

4. Provide the Student Intern with a copy of the school health services manual, school health policies/procedures, and discuss its contents.

5. Provide opportunities for guided observation and discuss with the Student Intern what she/he is initially observing.

6. Discuss with the Student Intern the various components of their learning agreement and give suggestions as to activities to include which will facilitate meeting the stated objectives of the course and requirements for certification.

7. Encourage Student Intern to ask questions concerning the handling of certain situations.

8. Emphasize the importance of using the nursing process to guide all activities, including assessment, nursing diagnoses, planning, implementation and evaluation.

9. Gradually delegate certain responsibilities to the Student Intern.

10. Schedule conference times, activities with the Student Intern to discuss concerns.

11. Give positive, constructive criticism and suggestions for improvement and continued growth.

12. Provide opportunities for the Student Intern to demonstrate initiative, creativity, flexibility, and decision-making skills.

13. Confer with the University Clinical Faculty and Student Intern after each University Clinical Faculty observation/visitation.

14. Complete and submit to the University Clinical Faculty a mid-term and final evaluation of the Student Intern in relation to the stated course objectives.

15. Complete a mid-term and final conference with the University Clinical Faculty and Student Intern.

16. Write a letter of recommendation for the Student Intern, if requested.

**University Clinical Faculty**
The University Clinical Faculty is a clinical professor of teaching and/or nursing process and evaluator of the Student Intern's performance and progress in the total teaching-learning process. The University Clinical Faculty is a facilitator of opportunities for students which allow for maximum development of the Student Intern's potential. The University Clinical Faculty is a liaison agent between the University and the cooperating public schools and a participant in the making of decisions affecting the Student Intern in the school.

A. To ensure that there are systematic procedures for assessing the Student Intern’s performance, Ashland University requires the following three-dimensional (University Clinical Faculty, District School Nurse Mentor if student’s level of experience requires, Student Intern) plan. It is the University Clinical Faculty's responsibility to ensure that each member of the triad/duo is aware of their individual roles and responsibilities.

B. The University Clinical Faculty will:

1. Supervise Student Interns during Internship experience:
   - Minimum of two (2) in-person contacts total with Intern for SNP 680 School Nurse Internship (2 credit hr). Weekly communications will be expected.
• Minimum of three (3) in-person contacts total with Intern for SNP 680 School Nurse Internship (3-4 credit hr). Weekly communications will be expected.

2. Refer to Handbook for SNP 680 School Nurse Internship for further responsibilities including evaluation reports.

3. Convey the components of the School Nurse Certificate to the Student Intern and the District School Nurse Mentor/Preceptor.

4. Arrange for the Intern’s introduction to the District School Nurse Mentor/Preceptor in the school system, if needed.

5. Gather data in relation to specific goals of the program by means of on-site visitations, including a mid-term conference, for the purpose of observing the Student Intern and contributing to her/his growth through support, constructive criticism and suggestions for improvement. A brief conference with the Intern and District School Nurse Mentor should follow the observation.

6. All visitations must be documented as follows:
   • Mileage Reimbursement Log Form
   • Narrative Observation Form

7. Review the Intern’s written evidence (competency) journal and lesson plans.

8. Confer with District School Nurse Mentor/Preceptor and/or principal when serious problems arise; discuss with the Director of School Nursing Program arrangements for the removal of Student Intern when such a decision is made.

9. Determine the Intern’s course grade for the clinical portion of the internship. Grade is based upon the following:
   • The District School Nurse Mentor’s detailed observation of the student under varying conditions and situations.
   • The written evaluations submitted by the District School Nurse Mentor. The University Clinical Faculty’s data from visitation and conferences, documentation of experiences as presented in the Intern’s journal including lesson plans.

11. Copies of the Final Evaluation and grade are to be submitted to the Intern and School Nursing Program Director.

Attendance Policies

1. Interns are expected to observe rules, regulations, and the accepted policies and procedures for school nurses in the district to which they are assigned, including arrival and departure times.

2. Interns are expected to follow the schedule of the school district rather than that of Ashland University, if there is a discrepancy in such events such as breaks and snow days.

3. Interns must be present at their assignment on every assigned day (e.g. five days per week for a specified number of weeks). All absences must be made up.

4. Interns are responsible for notifying the District School Nurse Mentor and/or Clinical Faculty the evening before, or the morning of, a justified absence. Failure to inform the District School Nurse Mentor and/or Clinical Faculty of absences and/or properly rescheduling for absences will be reflected in the student’s final evaluation and grade.

Attire

Student Interns are expected to dress in a professional manner which conforms to the established dress code policy of the school district to which they are assigned.
Health Requirements for Practicum/Clinical Engagement Experiences
SNP students enrolled in a course requiring engagement in a clinical setting (with or without client contact) are responsible for investigating and complying with the health/clinical requirements of the respective school setting. Students are responsible for payment of all required examinations, tests, clearances, or immunizations.

There continues to be considerable variation in district requirements regarding criminal record, child abuse requirements, and drug testing requirements. Therefore, graduate students are expected to follow the requirements of the district in which they will be completing a clinical internship.

Background Check Requirements
Criminal background inquiries will take place prior to clinical experiences in the School Nursing Program. The college reserves the right to withdraw any student based on the results of the inquiry, regardless of felony or misdemeanor convictions. A student who has been denied clinical placement by the college based on the results of a criminal background check may discuss the decision with the Dean of the College of Nursing and Health Sciences. If an affiliate agency in which a student is seeking assignment requires a more extensive check than completed, the student must meet that agency’s requirement for placement in that agency at the student’s expense.

Communicable & Non-communicable Illnesses
The College of Nursing and Health Sciences will maintain an environment that ensures the provision of safe, quality patient care and is also supportive of the well-being of students. Faculty and students will adhere to the Center for Disease Control (CDC) and Prevention Guidelines for work restrictions when exhibiting signs and/or symptoms or for post exposure follow-up of certain communicable diseases.
http://www.cdc.gov/mmwr/preview/mmwrhtml/mm6153a1.htm?s_cid=mm6153a1

The College of Nursing will maintain the confidentiality of all information related to student health. No specific information concerning diagnosis shall be provided to any persons including college administrators, faculty, and professional staff other than the Dean of the College of Nursing and Health Sciences without the expressed written consent of the student. No information can be released to another person, agency, insurer or institution without the prior written consent of the student involved.

Fees
An additional fee paid for the School Nurse Internship is used to offset the materials and expenses incurred by the University Supervisor. The fee is charged in the term in which the course is taken.
Application for Ohio Department of Education (ODE) Professional Pupil Services License: School Nurse

Applying for 5 Year ODE Professional Pupil Services License: School Nurse

1. Upon completion of the School Nurse Internship, the Program Director will verify completion of program requirements.

2. School Nursing Program Director will notify University Office of Teaching Licensure Office of student completion. This may take up to 4 weeks following the end of the internship semester.

3. Students are responsible for initiating application for the 5 year ODE Pupil Services license upon completion of the program.** Note: Choose the Pupil Services License as a School Nurse NOT the Registration option as a School Nurse. [https://education.ohio.gov/Topics/Teaching/Licensure](https://education.ohio.gov/Topics/Teaching/Licensure)

4. Students will need to submit BCI and FBI background checks (current within 365 days of application), transcript, and payment at the time of application directly to ODE. The current application fee (2016-2017) is $200.00.

5. Upon completion of the student application with ODE, student’s application status will be classified as “Pending” on ODE website.

6. ODE will contact the University to verify program completion. The student application status will remain “Pending” during this time. This may take 2-4 weeks after application submission.

7. Upon final verification from University with ODE regarding program completion, ODE will grant approval of license application.

8. All ODE licenses are effective July 1, regardless of the time of year application is submitted.**

**Note: All ODE licenses are issued effective July 1 of each year. For students applying for the 5 year license following completion of the Fall Internship, the 5 year license will be back-dated to July 1 of that year (immediately prior to the internship period). This option may result in the student needing to renew the 5 year license in 4 years, rather than 5 years. If the temporary license is active until June 30 of the following year, students may wait to apply for the 5 year license until the end of the school year. The 5 year license will then be dated July 1 following the completion of the temporary license. This option will provide the student with a full 5 years before renewal.

Visit the Ohio Department of Education Background Check FAQs page at [http://education.ohio.gov/Topics/Teaching/Licensure/Additional-Information/Background-Check-FAQs#FAQ1922](http://education.ohio.gov/Topics/Teaching/Licensure/Additional-Information/Background-Check-FAQs#FAQ1922) for more information.
Ohio Department of Education School Nurse Standards

Standard 1. Competent Practice: Candidates practice competently by providing nursing care within the scope of practice of nursing for a registered nurse in Ohio.

1.1 Candidates act as directed by the client's changing status, use safe nursing care as a basis for any observation or evaluation.
1.2 Candidates analyze data to reach a nursing diagnosis.
1.3 Candidates plan care based on desired outcomes.
1.4 Candidates implement a plan of care in an accurate, safe and timely manner.
1.5 Candidates evaluate and document response to nursing interventions in an accurate and timely manner.
1.6 Candidates use safe nursing care to prevent disease transmission in school and community.

2.1 Candidates collaborate with students, families and other school staff to promote educational goals and health of students and school.
2.2 Candidates consult with appropriate licensed practitioners including; other members of the health care or education team.
2.3 Candidates maintain confidentiality of student and family health and education information.
2.4 Candidates use safe nursing care as a basis for any advice, instruction, or teaching.
2.5 Candidates document all aspects of school nursing care according to rules and regulations governing nursing practice.

Standard 3. Professional Behavior: Candidates use professional behavior skills to provide leadership in the practice of school nursing.

3.1 Candidates practice according to legal and ethical principles.
3.2 Candidates direct nursing care through supervision and delegation and provide direction to a licensed practical nurse and delegate nursing tasks only in accordance with rules and regulations.
3.3 Candidates use principles of program management to facilitate school health services.
3.4 Candidates use leadership principles when directing school health programs.
3.5 Candidates advance school nursing practice through research utilization.
3.6 Candidates evaluate professional practice to assure quality.
3.7 Candidates engage in professional development and continuing education.
Standard 1. Assessment
The school nurse collects comprehensive data pertinent to the healthcare consumer’s health and/or the situation.

Standard 2. Diagnosis
The school nurse analyzes the assessment data to determine the diagnosis of issues.

Standard 3. Outcomes Identification
The school nurse identifies expected outcomes for a plan individualized to the healthcare consumer or the situation.

Standard 4. Planning
The school nurse develops a plan that prescribes strategies and alternatives to attain expected outcomes.

Standard 5. Implementation
The school nurse implements the identified plan.

Standard 5A. Coordination of Care
The school nurse coordinates care delivery.

Standard 5B. Health Teaching and Health Promotion
The school nurse employs strategies to promote health and a safe environment, especially regarding health education.

Standard 5C. Consultation
The school nurse provides consolation to influence the identified plan, enhance the abilities of others, and effect change.

Standard 6. Evaluation
The school nurse evaluates progress toward attainment of outcomes.

Standard 7. Ethics
The school nurse practices ethically.

Standard 8. Culturally Congruent Practice
The school nurse practices in a manner that is congruent with cultural diversity and inclusion principles.

Standard 9. Communication
The school nurse communicates effectively in all areas of practice.
Standard 10. Collaboration
   The school nurse collaborates with key stakeholders in the conduct of nursing practice

Standard 11. Leadership
   The school nurse leads within the professional practice setting and the profession

Standard 12. Education
   The school nurse seeks knowledge and competence that reflects current nursing practice and promotes futuristic thinking.

Standard 13. Quality of Practice
   The school nurse contributes to quality nursing practice.

Standard 14. Evidence-Based Practice and Research
   The school nurse integrates evidence and research findings into practice.

Standard 15. Professional Practice Evaluation
   The school nurse evaluates one’s own and others’ nursing practice.

Standard 16. Resource Utilization
   The school nurse utilizes appropriate resources to plan, provide, and sustain nursing services that are safe, effective, and fiscally responsible.

Standard 17. Environmental Health
   The school nurse practices in an environmentally safe and healthy manner.

Standard 18. Program Management
   The school nurse directs the health services program within the school and community that includes evidence-based practice and accountability measures for quality, student health, and learning outcomes.
