

# CCP Pathways

CCP pathways are flexible planning tools designed to help you choose college courses that fit your goals, schedule, and interests while you're still in high school. Ohio requires colleges to offer suggested 15- and 30-credit hour pathways, but you are not required to complete one. You may take as few or as many courses as you like, as long as you stay within the 30 credits per year and 120 total credits allowed. **The pathways shown are just examples of popular options at AU, and your CCP advisor can help you build a personalized plan.** A 15-hour pathway is ideal for lighter college coursework, while a 30-hour pathway is for students hoping to complete a full year of college credit. Associate degree pathways are also available for students not planning to pursue a bachelor's degree.
